

ESSENTIALS OF QUALITATIVE RESEARCH COURSE SERIES

PHD STUDENT PATHWAYS

For PhD students wishing to increase their knowledge and skills in critical qualitative health research, there are a variety of trajectories through the CQ curriculum, depending on their experience and academic background. Below are some suggested pathways. For more information about the EQR course series, including course descriptions, go to <http://www.ccqhr.utoronto.ca/education/about-course-series/>

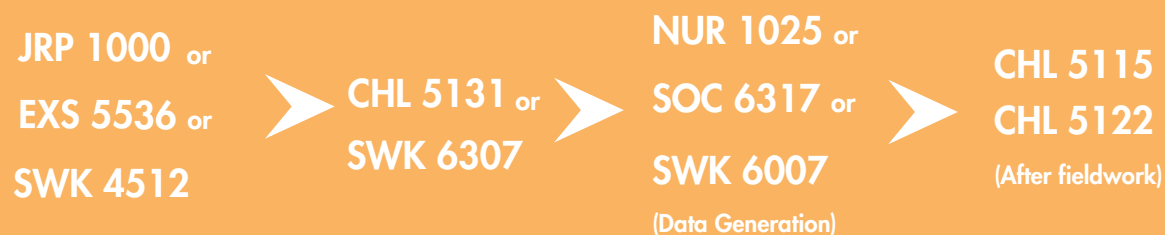

Pathway 1

For those who have not previously practiced or studied qualitative health research, and may or may not do a qualitative thesis, below are potential pathways

PHM 1137 or
EXS 5510 or
SWK 4512

Pathway 2

For those with minimal background in qualitative health research studies or experience, who are looking for a balanced development of theoretical depth and practical skills leading to a qualitative PhD, below are potential pathways

Pathway 3

For those with some theoretical background and practical skills with qualitative health research, who plan to do a qualitative thesis, below are potential pathways
