

ESSENTIALS OF QUALITATIVE RESEARCH COURSE SERIES MASTER'S CURRICULUM

Health sciences Master's (MSc) students usually take one comprehensive qualitative methodology course (such as CHL 5107 or PHM 1137).

However, four advanced courses (listed in the second column) on the theoretical foundations of method are available to Master's students who:

1. Are searching for in-depth preparation that may lead to a PhD program; or
2. Have extensive prior experience in qualitative health research.

Core Courses

CHL 5107

Introduction to Qualitative Research Methods

KIN 8310

Qualitative Research Methods

PHM 1137

Introduction to Qualitative Research Methods in the Health Sciences

Advanced Courses

CHL 5138

Critical Qualitative Health Research Theory and Methods

SWK 4512

Research Knowledge for Social Justice

KIN 5540

Narrative Methods in Health Research
